Werfen Sie Elektrowerkzeuge und Akkus/Batterien nicht in den Hausmüll!

**Nur für EU-Länder:**

Gemäß der europäischen Richtlinie 2012/19/EU müssen nicht mehr gebrauchsfähige Elektrowerkzeuge und gemäß der europäischen Richtlinie 2006/66/EC müssen defekte oder verbrauchte Akkus/Batterien getrennt gesammelt und einer umweltgerechten Wiederverwendung zugeführt werden.

Nicht mehr gebrauchsfähige Akkus/Batterien können direkt abgegeben werden bei:

**Deutschland**
Recyclingzentrum Elektrowerkzeuge
Osteroder Landstraße 3
37589 Kalefeld

**Schweiz**
Batrec AG
3752 Wimmis BE

**Änderungen vorbehalten.**

# English

## General Power Tool Safety Warnings

**WARNING** **Read all safety warnings and all instructions.** Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

**Save all warnings and instructions for future reference.**

The term “power tool” in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

### Work area safety

- **Keep work area clean and well lit.** Cluttered or dark areas invite accidents.
- **Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust.** Power tools create sparks which may ignite the dust or fumes.
- **Keep children and bystanders away while operating a power tool.** Distractions can cause you to lose control.

### Electrical safety

- **Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools.** Unmodified plugs and matching outlets will reduce risk of electric shock.
- **Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators.** There is an increased risk of electric shock if your body is earthed or grounded.
- **Do not expose power tools to rain or wet conditions.** Water entering a power tool will increase the risk of electric shock.
- **Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges and moving parts.** Damaged or entangled cords increase the risk of electric shock.
- **When operating a power tool outdoors, use an extension cord suitable for outdoor use.** Use of a cord suitable for outdoor use reduces the risk of electric shock.
- **If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply.** Use of an RCD reduces the risk of electric shock.

### Personal safety

- **Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication.** A moment of inattention while operating power tools may result in serious personal injury.
- **Use personal protective equipment. Always wear eye protection.** Protective equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.
- **Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool.** Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.
- **Remove any adjusting key or wrench before turning the power tool on.** A wrench or a key left attached to a rotating part of the power tool may result in personal injury.
- **Do not overreach. Keep proper footing and balance at all times.** This enables better control of the power tool in unexpected situations.
- **Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts.** Loose clothes, jewellery or long hair can be caught in moving parts.
- **If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used.** Use of dust collection can reduce dust-related hazards.

### Power tool use and care

- **Do not force the power tool. Use the correct power tool for your application.** The correct power tool will do the job better and safer at the rate for which it was designed.
- **Do not use the power tool if the switch does not turn it on and off.** Any power tool that cannot be controlled with the switch is dangerous and must be repaired.

OBJ_BUCH-2389-003.book Page 9 Wednesday, October 5, 2016 8:29 AM

- ▶ **Disconnect the plug from the power source and/or the battery pack from the power tool before making any adjustments, changing accessories, or storing power tools.** Such preventive safety measures reduce the risk of starting the power tool accidentally.
- ▶ **Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool.** Power tools are dangerous in the hands of untrained users.
- ▶ **Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool's operation. If damaged, have the power tool repaired before use.** Many accidents are caused by poorly maintained power tools.
- ▶ **Keep cutting tools sharp and clean.** Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.
- ▶ **Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed.** Use of the power tool for operations different from those intended could result in a hazardous situation.

### Battery tool use and care

- ▶ **Recharge only with the charger specified by the manufacturer.** A charger that is suitable for one type of battery pack may create a risk of fire when used with another battery pack.
- ▶ **Use power tools only with specifically designated battery packs.** Use of any other battery packs may create a risk of injury and fire.
- ▶ **When battery pack is not in use, keep it away from other metal objects, like paper clips, coins, keys, nails, screws or other small metal objects, that can make a connection from one terminal to another.** Shorting the battery terminals together may cause burns or a fire.
- ▶ **Under abusive conditions, liquid may be ejected from the battery; avoid contact. If contact accidentally occurs, flush with water. If liquid contacts eyes, additionally seek medical help.** Liquid ejected from the battery may cause irritation or burns.

### Service

- ▶ **Have your power tool serviced by a qualified repair person using only identical replacement parts.** This will ensure that the safety of the power tool is maintained.

## Safety Warnings for Drills and Screwdrivers

### GSB 14,4-2-LI Plus/GSB 18-2-LI Plus

- ▶ **Wear ear protectors when impact drilling.** Exposure to noise can cause hearing loss.

### GSR 14,4-2-LI Plus/GSR 18-2-LI Plus/ GSB 14,4-2-LI Plus/GSB 18-2-LI Plus

- ▶ **Hold power tool by insulated gripping surfaces when performing an operation where the cutting accessory or fastener may contact hidden wiring.** Cutting accessory and fasteners contacting a "live" wire may make exposed metal parts of the power tool "live" and could give the operator an electric shock.
- ▶ **Use auxiliary handle(s), if supplied with the tool.** Loss of control can cause personal injury.
- ▶ **Use appropriate detectors to determine if utility lines are hidden in the work area or call the local utility company for assistance.** Contact with electric lines can lead to fire and electric shock. Damaging a gas line can lead to explosion. Penetrating a water line causes property damage.
- ▶ **Switch off the power tool immediately when the tool insert jams. Be prepared for high reaction torque that can cause kickback.** The tool insert jams when:
  —the power tool is subject to overload or
  —it becomes wedged in the workpiece.
- ▶ **Hold the machine with a firm grip.** High reaction torque can briefly occur while driving in and loosening screws.
- ▶ **Secure the workpiece.** A workpiece clamped with clamping devices or in a vice is held more secure than by hand.
- ▶ **Always wait until the machine has come to a complete stop before placing it down.** The tool insert can jam and lead to loss of control over the power tool.
- ▶ **Do not open the battery.** Danger of short-circuiting.

**Protect the battery against heat, e. g., against continuous intense sunlight, fire, water, and moisture.** Danger of explosion.

- ▶ **In case of damage and improper use of the battery, vapours may be emitted. Ventilate the area and seek medical help in case of complaints.** The vapours can irritate the respiratory system.
- ▶ **Use the battery only in conjunction with your Bosch power tool.** This measure alone protects the battery against dangerous overload.
- ▶ **The battery can be damaged by pointed objects such as nails or screwdrivers or by force applied externally.** An internal short circuit can occur and the battery can burn, smoke, explode or overheat.

## Additional Safety and Working Instructions

- ▶ **Dusts from materials such as lead-containing coatings, some wood types, minerals and metal can be harmful to one's health and cause allergic reactions, lead to respiratory infections and/or cancer.** Materials containing asbestos may only be worked by specialists.
  – Provide for good ventilation of the working place.
  – It is recommended to wear a P2 filter-class respirator.

OBJ_BUCH-2389-003.book Page 10 Wednesday, October 5, 2016 8:29 AM

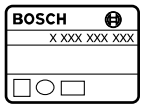

Observe the relevant regulations in your country for the materials to be worked.

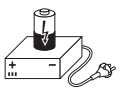

- ▶ **Prevent dust accumulation at the workplace.** Dusts can easily ignite.
- ▶ **The battery is supplied partially charged. To ensure full battery capacity, completely charge the battery in the battery charger before using for the first time.**
- ▶ **Read the operating instructions of the battery charger.**
- ▶ **Apply the power tool to the screw only when it is switched off.** Rotating tool inserts can slip off.
- ▶ **Adjust the gear switch only when the machine is at a complete stop.**
- ▶ **Always push the gear selector and turn the operating mode selector switch through to the stop.** Otherwise, the machine can become damaged.

To save energy, only switch the power tool on when using it.

## Symbols

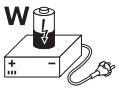

The following symbols are important for reading and understanding the operating instructions. Please take note of the symbols and their meaning. The correct interpretation of the symbols will help you to use the machine in a better and safer manner.

| Symbol | Meaning |
|---|---|
|  | GSR 14,4-2-LI Plus/GSR 18-2-LI Plus/GSB 14,4-2-LI Plus/GSB 18-2-LI Plus: Cordless screwdriver/Combination cordless drill<br>Grey-marked area: Handle (insulated gripping surface) |
|  | Article number |
|  | Read all safety warnings and all instructions |
|  | Before any work on the machine itself, remove the battery |
|  | Always wear ear protection |
|  | Movement direction |

## Delivery Scope

Cordless screwdriver/Combination cordless drill.
Battery, application tools and other accessories shown or described are not part of the standard delivery scope.

A complete overview of accessories can be found in our accessories program.

## Intended Use

The machine is intended for driving in and loosening screws as well as for drilling in wood, metal, ceramics and plastic. GSB machines are additionally intended for impact drilling in bricks, brickwork and masonry.

The light of this power tool is intended to illuminate the power tool's direct area of working operation and is not suitable for household room illumination.

## Technical Data

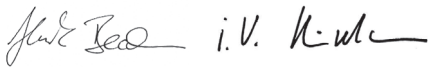

The technical data of the machine are listed in the table on page 163.

## Declaration of Conformity CE

We declare under our sole responsibility that the product described under "Technical Data" is in conformity with all relevant provisions of the directives 2009/125/EC (Regulation 1194/2012), 2011/65/EU, until 19 April 2016: 2004/108/EC, from 20 April 2016 on: 2014/30/EU, 2006/42/EC including their amendments and complies with the following standards: EN 60745-1, EN 60745-2-1, EN 60745-2-2, EN 50581.

Technical file (2006/42/EC) at:
Robert Bosch Power Tools GmbH, PT/ECS,

Stuttgart, 01.01.2017

## Noise/Vibration Information

The measured values of the machine are listed in the table on page 163.

Sound emission values determined according to EN 60745-2-1.

Vibration total values $a_h$ (triax vector sum) and uncertainty K determined according to EN 60745-2-1.

The vibration level given in this information sheet has been measured in accordance with a standardised test given in EN 60745 and may be used to compare one tool with another. It may be used for a preliminary assessment of exposure.
The declared vibration emission level represents the main applications of the tool. However if the tool is used for different applications, with different accessories or insertion tools or is poorly maintained, the vibration emission may differ. This may significantly increase the exposure level over the total working period.
An estimation of the level of exposure to vibration should also take into account the times when the tool is switched off or when it is running but not actually doing the job. This may significantly reduce the exposure level over the total working period.
Identify additional safety measures to protect the operator from the effects of vibration such as: maintain the tool and the accessories, keep the hands warm, organisation of work patterns.

## Mounting and Operation

| Action | Figure | Page |
|---|---|---|
| Removing the battery | **1** | 164 |
| Inserting the battery | **2** | 164 |
| Mounting application tools | **3** | 164 |
| Reversing the rotational direction | **4** | 165 |
| Setting the torque | **5** | 165 |
| Selecting the drilling position | **6** | 166 |
| Setting the operating mode | **7** | 166 |
| Gear selection, mechanical | **8** | 166 |
| Mounting/dismounting the belt clip | **9** | 167 |
| Mounting/dismounting the bit holder | **10** | 167 |
| Switching On and Off | **11** | 167 |
| Selecting Accessories | **–** | 168 |

OBJ_BUCH-2389-003.book Page 12 Wednesday, October 5, 2016 8:29 AM

## Maintenance and Cleaning

► **For safe and proper working, always keep the machine and ventilation slots clean.**

Clean the application tool, the tool holder, the power tool's ventilations slots, and the battery's ventilation slots each time after using.

## After-sales Service and Application Service

Our after-sales service responds to your questions concerning maintenance and repair of your product as well as spare parts. Exploded views and information on spare parts can also be found under:
**www.bosch-pt.com**
Bosch's application service team will gladly answer questions concerning our products and their accessories.

In all correspondence and spare parts order, please always include the 10-digit article number given on the type plate of the machine.

## Transport

The contained lithium-ion batteries are subject to the Dangerous Goods Legislation requirements. The user can transport the batteries by road without further requirements.
When being transported by third parties (e. g.: air transport or forwarding agency), special requirements on packaging and labelling must be observed. For preparation of the item being shipped, consulting an expert for hazardous material is required.

Dispatch batteries only when the housing is undamaged. Tape or mask off open contacts and pack up the battery in such a manner that it cannot move around in the packaging. Please also observe possibly more detailed national regulations.

## Disposal

The machine, rechargeable batteries, accessories and packaging should be sorted for environmental-friendly recycling.

Do not dispose of power tools and batteries/rechargeable batteries into household waste!

OBJ_BUCH-2389-003.book Page 13 Wednesday, October 5, 2016 8:29 AM

**Only for EC countries:**

According to the European Guideline 2012/19/EU, power tools that are no longer usable, and according to the European Guideline 2006/66/EC, defective or used battery packs/batteries, must be collected separately and disposed of in an environmentally correct manner.

Batteries no longer suitable for use can be directly returned at:

## Avertissements de sécurité généraux pour l'outil

**AVERTISSEMENT** **Lire tous les avertissements de sécurité et toutes les instructions.** Ne pas suivre les avertissements et instructions peut donner lieu à un choc électrique, un incendie et/ou une blessure sérieuse.

**Conserver tous les avertissements et toutes les instructions pour pouvoir s'y reporter ultérieurement.**

Le terme « outil » dans les avertissements fait référence à votre outil électrique alimenté par le secteur (avec cordon d'alimentation) ou votre outil fonctionnant sur batterie (sans cordon d'alimentation).

### Sécurité de la zone de travail

- **Conserver la zone de travail propre et bien éclairée.** Les zones en désordre ou sombres sont propices aux accidents.
- **Ne pas faire fonctionner les outils électriques en atmosphère explosive, par exemple en présence de liquides inflammables, de gaz ou de poussières.** Les outils électriques produisent des étincelles qui peuvent enflammer les poussières ou les fumées.
- **Maintenir les enfants et les personnes présentes à l'écart pendant l'utilisation de l'outil.** Les distractions peuvent vous faire perdre le contrôle de l'outil.

### Sécurité électrique

- **Il faut que les fiches de l'outil électrique soient adaptées au socle. Ne jamais modifier la fiche de quelque façon que ce soit. Ne pas utiliser d'adaptateurs avec des outils à branchement de terre.** Des fiches non modifiées et des socles adaptés réduiront le risque de choc électrique.
- **Eviter tout contact du corps avec des surfaces reliées à la terre telles que les tuyaux, les radiateurs, les cuisinières et les réfrigérateurs.** Il existe un risque accru de choc électrique si votre corps est relié à la terre.
- **Ne pas exposer les outils à la pluie ou à des conditions humides.** La pénétration d'eau à l'intérieur d'un outil augmentera le risque de choc électrique.
- **Ne pas maltraiter le cordon. Ne jamais utiliser le cordon pour porter, tirer ou débrancher l'outil. Maintenir le cordon à l'écart de la chaleur, du lubrifiant, des arêtes ou des parties en mouvement.** Les cordons endommagés ou emmêlés augmentent le risque de choc électrique.
- **Lorsqu'on utilise un outil à l'extérieur, utiliser un prolongateur adapté à l'utilisation extérieure.** L'utilisation d'un cordon adapté à l'utilisation extérieure réduit le risque de choc électrique.
- **Si l'usage d'un outil dans un emplacement humide est inévitable, utiliser une alimentation protégée par un dispositif à courant différentiel résiduel (RCD).** L'usage d'un RCD réduit le risque de choc électrique.

### Sécurité des personnes

- **Rester vigilant, regarder ce que vous êtes en train de faire et faire preuve de bon sens dans l'utilisation de l'outil. Ne pas utiliser un outil lorsque vous êtes fatigué ou sous l'emprise de drogues, d'alcool ou de médicaments.** Un moment d'inattention en cours d'utilisation d'un outil peut entraîner des blessures graves des personnes.
- **Utiliser un équipement de sécurité. Toujours porter une protection pour les yeux.** Les équipements de sécurité tels que les masques contre les poussières, les chaussures de sécurité antidérapantes, les casques ou les protections acoustiques utilisés pour les conditions appropriées réduiront les blessures des personnes.
- **Eviter tout démarrage intempestif. S'assurer que l'interrupteur est en position arrêt avant de brancher l'outil au secteur et/ou au bloc de batteries, de le ramasser ou de le porter.** Porter les outils en ayant le doigt sur l'interrupteur ou brancher des outils dont l'interrupteur est en position marche est source d'accidents.
- **Retirer toute clé de réglage avant de mettre l'outil en marche.** Une clé laissée fixée sur une partie tournante de l'outil peut donner lieu à des blessures de personnes.
- **Ne pas se précipiter. Garder une position et un équilibre adaptés à tout moment.** Cela permet un meilleur contrôle de l'outil dans des situations inattendues.
- **S'habiller de manière adaptée. Ne pas porter de vêtements amples ou de bijoux. Garder les cheveux, les vêtements et les gants à distance des parties en mouve-**
